

SUPERMINI BARS CSM

Specifically designed for Narrow Kerf Chain
used on small saws less than 60 cc

Designed for use with narrow kerf chain for high maneuverability, 1.75" tip diameter

Ideal for log home builders, carvers and tree service professionals

Available in lengths from 12" to 32"

Motor mounts available for most makes and models of chainsaws

Available in .325" pitch and 3/8" low profile

Available in .050 and .058 gauge

Replaceable sprocket tip

Oil Hole Gasket CBW-30000

Our C1 mount is a combination mount that fits on many chainsaws. Being a combination mount, there are oil holes not being used, and some oil may leak out. We designed this gasket to fit on the outside of the bar over the bar studs to stop oil from leaking out of unused oil holes.
